1 **4** **10** Best

This vehicle emits 442 grams CO₂ per mile. The best emits 0 grams per mile. The best vehicle in the class is a plug-in hybrid electric vehicle (PHEV). PHEVs have a gas engine and an electric motor. They can run on gas or electricity. They also have a battery pack. The battery pack can be recharged by plugging it into an electric outlet. PHEVs can drive on electricity for a limited distance. After the battery is depleted, they can switch to gas. PHEVs are a good choice for people who want to reduce their emissions but don't have access to a charging station. They can also be used as a backup power source. PHEVs are available in a variety of models and price ranges. Learn more about PHEVs at [fueleconomy.gov](https://www.fueleconomy.gov).

Actual results will vary for many reasons, including driving conditions and how you drive and maintain your vehicle. The average new vehicle gets 28 MPG and costs \$9,500 to fuel over 5 years. Cost estimates are based on 15,000 miles per year at \$ 3.50 per gallon. MPGe is miles per gasoline gallon equivalent. Vehicle emissions are a significant cause of climate change and smog.
